A number of titles mentioned in the articles in this monograph are not included in this list. Please rest assured that these omissions do not reflect on the quality of the recordings. Rather, missing recordings are the result of the Mail Order Service being in its first year of operation, and our inability to gather all relevant materials (mostly due to financial constraints). We plan to continually add to our holdings and would appreciate any suggestions about specific titles you would like to see us carry. Please write. If at all possible, we'd appreciate your letting us know whom we should contact to gain a supply of the recordings. Consignment arrangements are most welcome.
